

WEDNESDAY, FEBRUARY 9, 1 P. M.

Mr. Spencer sells at auction, this morning, two pieces of furniture. This is the most useful chamber furniture now used; it is not only useful but ornamental. A fine gold repeating watch will also be sold.

Bayne's Panoramas of a Voyage to Europe still continues to have its attractive sway, and we are pleased to see so large a portion of the levities of Louisville nightly in attendance at Old Fellow's Hall to view the countless beauties of this unequalled panoramic picture. Two exhibitions to-day—5 in the afternoon and 74 at night.

The Cincinnati Gazette says that the notes of the State Stock Bank of Indiana are taken by the banks of that city.

We are indebted to the *Belle Key* for late New Orleans papers. We have no copy of her masthead. We understand that she brought very little to port.

The *Spartan*.—This steamer is here, but we understand from Capt. J. M. Martin that she will leave positively this evening. The *Spartan* is a boat of the largest class, well provided for accommodating passengers, and is commanded by Capt. M. Martin, one of the most popular officers on the river.

The *Navigator* will leave for Pittsburgh this evening. The Blue Wing leaves for the Kentucky river. The Clipper goes to Henderson.

The *Tobehmeng*, as we learn by a telegraphic dispatch, left Tuscumbia last evening for that port.

The Mary Hunt passed Vicksburg yesterday on her upward trip with a full freight.

We did not get our Eastern exchanges from the post-office till about dark last evening. The mailboat did not arrive until noon, having been delayed a fog.

The United States and England.—It will be seen from the telegraphic report of the Congressional proceedings that the bill proposed by England of the settlement of the fishery question has been submitted to both houses of Congress.

The Atlantic has arrived from Liverpool. The most important item of intelligence by her is the announcement of the approaching marriage of Napoleon.

We are indebted to the clerk of the Geo. Campbell for a copy of her manifesto. The Campbell brought down a locomotive and tender for the Memphis and Charleston railroad.

MATAMOROS REVOLUTION.—See telegraphic dispatch from New Orleans.

LOUISVILLE HOTEL.—The office at this house is now on the first floor of the new wing on Sixth street. It is a large room, well suited for the purpose. The leather, the tiling, the ceiling, the walls, all built up, are new. In a few days a new building, five stories high, with a stone front similar to that of the Girard House in Philadelphia, is to be erected in its place. It will be then one of the finest hotel in the West.

IMPORTANT DECISION.—We are indebted to a legal friend for the following decision made in the circuit court yesterday by Hon. W. F. Bullock, judge of the first district of that important Jefferson Circuit Court.

This was a suit against Graham, Floyd, & Co. for failure to deliver 4,000 hogs, alleged to have been delayed by defendant, at \$10 per head. The plaintiff was nonsuited, the court being of the opinion that the contract was not proven.

The bill to establish the territorial government in Nebraska was delayed till the hour of recess.

CINCINNATI, Feb. 8, P. M.

A collision between the Jefferson and the Collier occurred on the Monongahela, about the time of the New York Courier and Englewood's reference to negotiations to be pending with England. We are informed, from a reliable source, that the Collier, which was captured in the English Channel, was captured in the provinces, with the exception, at present, of New York, in the right of drying and curing their fish on the coast opposite the port of the administration, duty free, into the markets of the United States, the products of the colonies, which were principally enjoyed by British subjects on the coasts and shores of the United States. It is also known that the Collier, which was captured in the provinces, in concert with the provinces, to the reciprocal free trade with the provinces, in certain ports of the United States, the Wabash, and canal, and canal would be conceded as a part of the territory of the provinces.

House.—A message was received from the Secretary of State, recommending the passage of an act of Congress giving the president power to enter into a compact with the United States, on condition that the fisheries of the U. S. be admitted into the full participation of the provincial fisheries.

The bill was introduced into the House by Mr. Gwin, of Georgia, and was referred to the Committee on Foreign Affairs, and neither boat was seen by the other until the collision took place. The Bayard struck the Collier, which was carrying a number of servants and the cook-chowder, carrying a number of servants, who were in the cook-house, were injured—one or two very severely, and it is feared, fatally.

We copy the following from the St. Louis Union:

CINCINNATI, Feb. 8, P. M.

The Fair-Court publishes additional statistics, embracing, however, only a few places in Iowa and Illinois. The increase over last year, for three hundred and sixty-five thousand.

Mr. Fuller is improving and there are hopes of his recovery.

PHILADELPHIA, Feb. 8.

The Pennsylvania Railroad Company, at their meeting this evening, voted to pay the sum of \$750,000 to the Marietta and Cincinnati railroad, and \$100,000 to the Springfield and New Haven railroads, and \$300,000 to the Ohio and Indiana railroads.

BALTIMORE, Feb. 8, P. M.

A bill was introduced into the House of Representatives on the 17th of July last, to admit railroad iron free of duty, and laid on the table a motion to reconsider that vote, which had since been pending, was on Thursday laid on the table by a vote of 95 to 82. A bill was introduced in the name of Wednesdays, from the Committee on Territories, to organize the territorial government of Nebraska.

The river has attained a threatening height, but there is no danger of an overflow any longer. It thawed freely yesterday. Last night it was very cold.

TERRELL, Tex.—The attention of planters generally is invited to the advertisement in another column of a choice lot of fresh tobacco seed which has just been received by Messrs. E. Webb, Rowland, & Co. from T. M. Woodbridge, Esq., and Gilean R. Smith, very exclusive planters of Christiana, Ky. The shipments made by these gentlemen are to be considered fully tested, and the price paid is proved equal in all respects to the finest raised in the "Old Dominion" for richness of color, delicacy of texture, and fine flavor, and sold at the highest prices any tobacco brought in our market, say \$9 to \$15 per hundred. We compare a specimen of this tobacco, which was purchased at one of the factories here, with James Bond, and it was as sweet and nice as the latter or any other of the most renowned Virginia brands.

The seed is put up ready in papers and may be had at the counting-room of E. Webb, Rowland, & Co. and at the Farmers' Warehouse, by any who may wish to try it.

FIRE AT BOSTON.—The Telegraph has already brought to the intelligence of the burning of the drug store of Hendsway, Eliotson, & Co., a Boston. The Boston Journal says:

At present it is impossible to state the amount of loss to Hendsway, Eliotson, & Co., but they are insured for \$45,000 or \$50,000.

WE stated the other day that Prof. Rainey was about to lecture on the subject of the burning of the Emerson wagon, and our New York exchanges carry Prof. Rainey's name on all the sections of the proceedings of Prof. Rainey, and expressly states that he has been forbidden to lecture upon this subject.

LATE FOR HAVANA.—The steamship Empress City arrived at New York on Thursday evening. She left Havana on the 2d inst.

The health of Havana was good, the small pox having entirely disappeared. The effect of Mr. Everett's letter to the British and French Ministers, relative to the tripartite (Cuba) treaty, we learn, has created a marked sensation at Havana. The Creoles are said to like it, but the Spaniards generally say it seems "illiberal."

Considerable excitement was created on the evening of the 22d, in consequence of the passage of a merchant steam in sight of the Moro Castle, without any national ensign, the principal officer appears to have been ignorant of the sentiments on religious matters. For a time he was unable to get into the port, but did not command it.

This is rather an unusual occurrence, the port authority to take exception, whether Protestant or Catholic, is a Catholic, a consistent and acknowledged member of the church.

Large Fire.—The alarm of fire about half-past two yesterday morning was occasioned by the burning of the Vermosa, on the south side of the harbor, near Man and Walnut, to which John Fisher, bartender, and son, was present. He is a Catholic, but makes no pretensions to be a member of the church.

At the city of Matanzas, the night of the 23d, there was also a demonstration of gallantry on the part of the Spanish authorities for the protection of the approaches to the city, but the Royal dragons were in sight in eight minutes from the moment of alarm.

THE NEW YORK EXPRESS, of Friday, says:

"There is an activity in the mercantile ranks, particularly in mercantile notes and acceptances.

"There is no extraordinary press for money, but a few are to be had to 100 and 150 notes. The interest of the money market depends on the value of the foreign exchanges, and although we are in good condition to consider a favorable drainage of specie, the arrival of brotherhoods, we suppose, for which it is admirably adapted."—*N. Y. Picayune*.

NATIONAL AGRICULTURAL SOCIETY.—We subjoin the proceedings of this body on the second day, as we find them telegraphed to the New York paper:

WASHINGTON, Feb. 3.

The Agricultural Society met at 9 this morning. Nineteen States were represented by about 100 members.

The various committees reported an amendment to the constitution, authorizing the holding of the annual meeting to the last Wednesday of February, which was adopted.

President Fillmore, Gen. Force, Samuel Appleton, Thos. H. Perkins, Robert G. Shaw, Edmonstone, and others.

The special order, a resolution to memorialize Congress to establish a Department of Agriculture, was taken up.

President Fillmore declaimed. Corn has declined, I am in good demand and bacon is active.

Meers, French and Mapes briefly endorsed the resolution, when it was adopted unanimously.

President Fillmore and Secretary Stowe entered, and were received with marked attention, the members rising. The Society then proceeded to bid for officers, and the following were elected:

President—Marshall F. Wilder.

(A vice president for each State was elected, Robert M. Mather, Esq., of Oldham, being elected for that office from Kentucky.)

Missouri, J. D. Walker, Moses Maxwell, Arthur Williams, Richard C. Corcoran, Corresponding Secretary—J. C. G. Kennedy.

Recording Secretary—W. H. King.

Treasurer—William Sudder.

The treasurer reported the funds of the Society to be about \$100,000 since its formation.

Dr. Elwyn presented a paper written by Prof. Bowles of Princeton, arguing that the old system of the present was better than the new, of immediate practical value to the farmer.

Mapes and others voted to refer his paper to a committee.

The Turks are pressing operations vigorously against the Montenegrins.

Large shipments of provisions are making to the Orient.

On motion of Mr. Poore, circulars were directed to be addressed to home and foreign agricultural societies, proposing the interchange of publications.

Mr. Wheeler suggested the propriety of immediately calling a session of the Agricultural Society to consider the same.

Dr. Elwyn has discharged all her forces from the army.

Adams' men have come to Geneva.

The victim is Daniel Mazrima, who is sentenced to 3 years' imprisonment for the crime of premeditated murder.

He is to be tried on Feb. 10.

THE ATLANTIC has arrived from Liverpool.

The most important item of intelligence by her is the announcement of the approaching marriage of Napoleon.

We are indebted to the clerk of the Geo. Campbell for a copy of her manifesto.

The Campbell brought down a locomotive and tender for the Memphis and Charleston railroad.

THE SPARTAN.—See telegraphic dispatch from New Orleans.

LOUISVILLE HOTEL.—The office at this house is now on the first floor of the new wing on Sixth street. It is a large room, well suited for the purpose. The leather, the tiling, the ceiling, the walls, all built up, are new. In a few days a new building, five stories high, with a stone front similar to that of the Girard House in Philadelphia, is to be erected in its place. It will be then one of the finest hotel in the West.

It will be open to the public on Feb. 10.
